# PRICE LIST EURO

For larger jobs, with fine finish quality, the 1-liter cup might cause fatigue after hours of spraying. ProComp™ can make your work a lot lighter and more comfortable as this extra external compressor makes it possible to separate the material from the gun. The powerful compressor attaches to any HVLP TurboForce™ sprayer: it takes only a few seconds without any tools. No controls (kits available for manual settings)

## OPTIMIZE FLOW AND PRESSURE

When extending your hose length (over 15 m), it is always recommended to increase your hose diameter. Larger ID reduces friction.

## OPTIMIZE FINISH QUALITY

In a standard airless system, the paint passes through 3 filters before atomisation: inlet screen, pump filter and the gun filter.

The first filter is the biggest, the last one, the smallest.

# PRICE LIST EURO

OPTIMIZE PRODUCTIVITY – feeds the pump using gravity.  
Benefits when using thick materials such as plasters and fillers.  
Large capacity enables working for longer periods of time before refilling.

# TIPS

Sorted per type of tip,  
including all available sizes

## 1. UNDERSTANDING TIPS

### The right tip:

- Increases your performance
- Improves the quality of your work
- Keeps your costs under control

## 2. WHAT DOES A TIP TELL YOU? CRACKING THE CODE

The **colour** tells you which **application** you can use the tip for

-  For fine finish applications with thin material at the **lowest pressure**
-  For every interior and exterior paint job at the **lowest pressure**
-  For wall painting and spraying in general
-  For thin plastering and less fluid materials
-  For protective coatings – up to 500 bar
-  For marking and striping applications

**5** The **first number** indicates the **fan width** of the tip

The first digit of the code, when multiplied by 5, tells you the fan width of the tip in cm when sprayed at a distance of 30 cm from the surface.

$$5 \times 5 = 25 \text{ cm}$$

**17** The **last two numbers** indicate the **material output** of the tip

The last two digits show the size of the spray orifice, indicated in one thousandths of an inch. The higher the number, the greater the flow with which you can spray.

**17' matches an orifice of 0.017 inch**

## 3. ADJUSTING TO THE RIGHT TIP

By experimenting with various tips, you become experienced and can easily decide which tip is the best one for your application.

### TOO MUCH PAINT?

0.017" =  
1.2 litres/minute

1) **Use a smaller tip orifice**  
15 instead of 17

2) **Increase the spray angle**  
7 instead of 5

### NOT ENOUGH PAINT?

0.017" =  
1.17 litres/minute

1) **Use a larger tip orifice**  
19 instead of 17

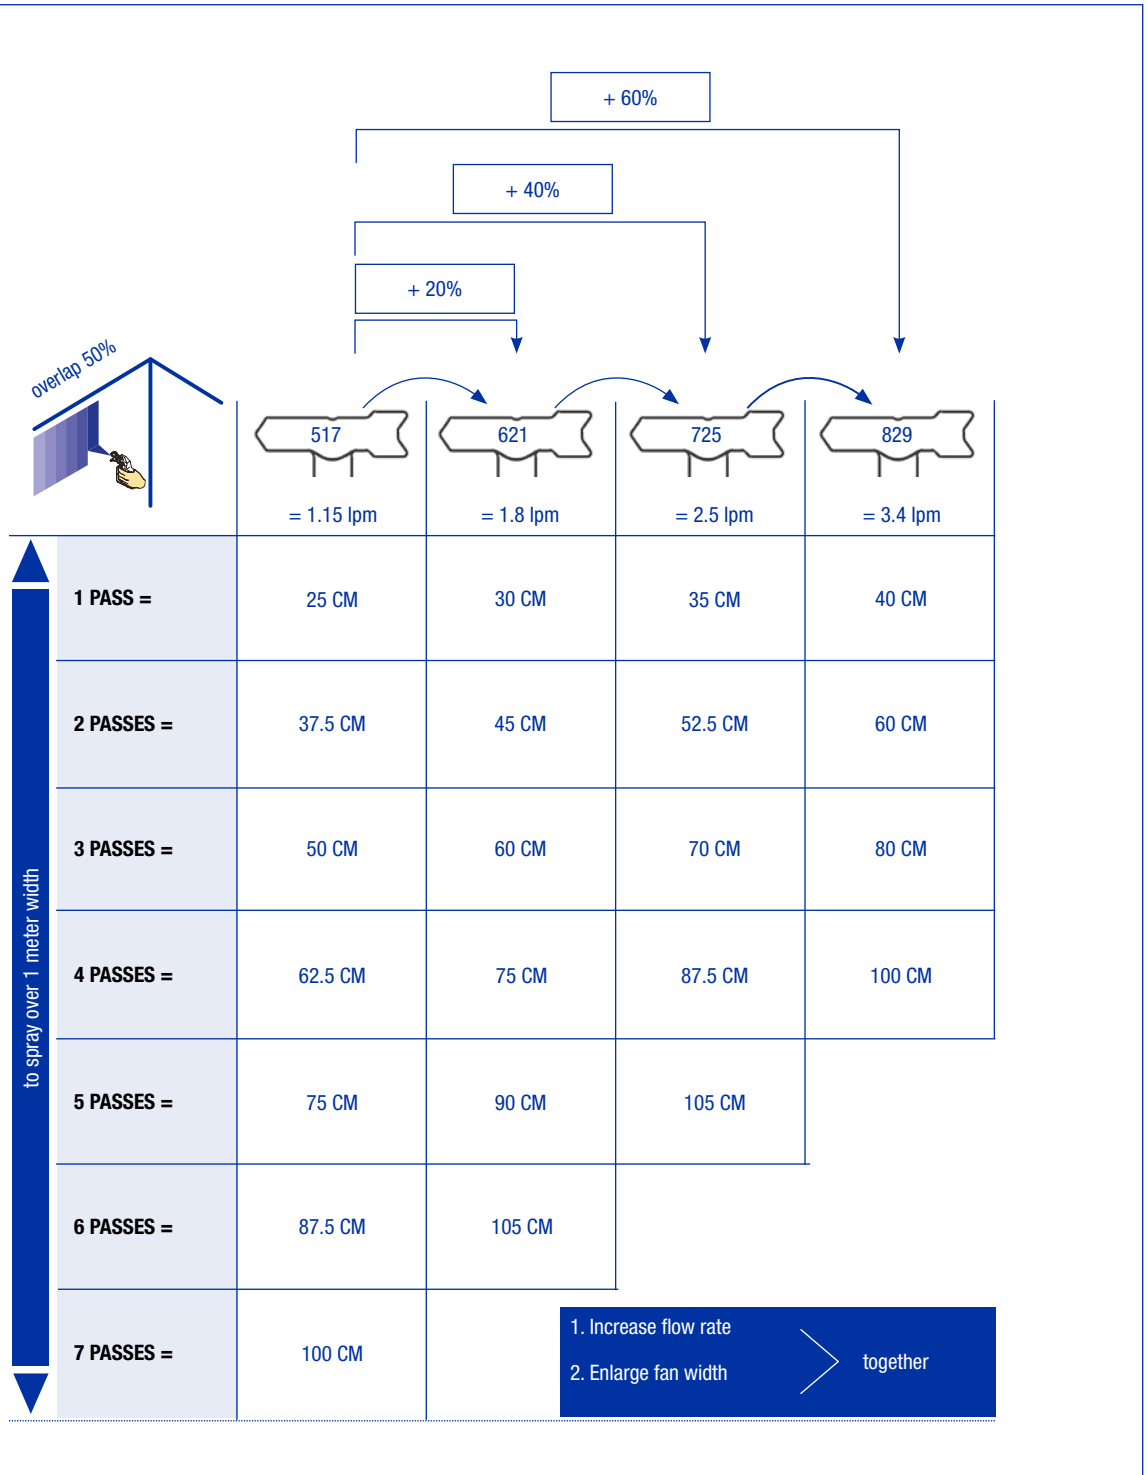

2) **Decrease the spray angle**  
3 instead of 5

# TIP SELECTION GUIDE

## 4. INCREASING PRODUCTIVITY WITH TIPS

## 5. A TIP ON TIPS

### WHAT IS TIP WEAR?

1 + 2

**FAN WIDTH DECREASES**  
= more passes necessary  
= more labour

**ORIFICE SIZE INCREASES**  
= more paint comes out  
= more material cost

=

**TWICE THE LABOUR!**  
+ 30% More paint for the same surface!

### WHAT HAPPENS WHEN A TIP GETS WORN OUT?

Piston work pressure and abrasive material are the two main causes of worn-out tips.

The fan width decreases:  
> More spray movements are necessary  
**= more work**

Greater tip orifice:  
> More paint comes out of the piston  
**= more costs for materials**

twice as much work  
+ 30% more paint for the same surface

### TIP WEAR CHART:

**BREAKTHROUGH LOW PRESSURE SMARTTIP™ TECHNOLOGY, ENGINEERED TO DELIVER THE INDUSTRY'S BEST FINISH!**

Featuring the patented Graco RAC® X Tip with **SMARTTIP™ TECHNOLOGY** and exclusive internal tip geometry which delivers the industry's best finish at the lowest airless spray pressure!

## BREAKTHROUGH **ATOMIZATION**

- Ability to spray at low pressures without tails
- Better finish at all pressures – works well with hard to atomize Low VOC materials

## BREAKTHROUGH **RELIABILITY**

- Longer tip life when used at low pressure
- Less stress and strain on the sprayer

## BREAKTHROUGH **VERSATILITY**

- Longer hose lengths
- Smaller diameter hose

**SMARTTIP™ TECHNOLOGY** is designed to work with Graco's exclusive **SMARTCONTROL™ PRESSURE MANAGEMENT SYSTEM** to deliver a superior spray fan without pressure fluctuations – at all spraying pressures!

**LOW PRESSURE  
TECHNOLOGY  
EXTENDED TO  
LARGER TIP SIZES!**

Graco does not cover wear items: tips, filters, sleeves, rods, packings, repair kits, seats, balls, brushes, dies,...

Components not manufactured by Graco are covered by their own warranties: gasoline engines, hoses, water pumps and batteries. All Graco products are covered by a one year warranty period against manufacturing defects. Consult our "Blue Book" (Form No. B0170) for complete detailed information on Graco's policies (warranty, freight, returns, etc.).

## OUR PROMISE TO YOU

Since 1926, **innovation**, **quality** and **A+ service** have been at the centre of Graco.

### Experience innovation

Our focus on innovation results in products and equipment that lead the industry with technologically-advanced features, pioneering design, high performance and unparalleled reliability. In short, innovation is how you get better products!

### Building quality

You are investing in high-quality products built to last for years of reliable service. Moreover, we partner with our customers to better understand how you're deploying our products in the field, then use your experiences to improve performance and durability.

### A+ service, every time

You'll see A+ Service in action when you contact any of our support services options no matter where you are in the world. We'll listen to your situation and work methodically to resolve it as quickly as we can. We are guided by a mindset of integrity and a customer service view centred on collaboration and relationships, not transactions.

We are here to answer questions and help address your needs.
